Free Load Log — 3 Lifts

Double-progression card + a 60-second stall check. Fill this in at your next session and you'll know whether you're progressing or stuck.

Step 1 — Pick 3 lifts

One from each pattern. Pick lifts you already do and can repeat every week.

Pattern	Examples	My lift
Push	Bench press, overhead press, incline dumbbell press	
Pull	Barbell row, weighted pull-up, chest-supported row	
Squat or hinge	Back squat, Romanian deadlift, leg press	

Step 2 — Set a rep range for each

Pick a range about 4 reps wide. Common choices: **5–8**, **6–10**, or **8–12**.

Step 3 — The double-progression rules

1. Use the **same load** every session until you hit the **top of the range on every work set** with clean form.
2. Then **add load**: the smallest jump available (about 2.5–5 lb upper body, 5–10 lb lower body), and drop back to the bottom of the range.
3. End most work sets with about **0–3 reps in reserve (RIR)**. RIR means how many more clean reps you could have done.
4. **Progress means more load or more clean reps** than last time. Pump and soreness don't count.

Step 4 — Log every work set

Date	Lift	Load	Set 1 reps	Set 2 reps	Set 3 reps	RIR (last set)	Notes (sleep, stress, form)

Step 5 — The 60-second stall check

For each lift, look at your last sessions:

- Did you add load **or** add at least one clean rep in the last 2 sessions? → **Not stalled.** Keep going.
- **2 or more sessions at the same load** without hitting the top of the range clean? → **Stalled.**

Stalled? Here's the part this card can't do

A stall has three possible causes: **effort** (sets ending too easy), **volume** (too few or too many hard sets), or **recovery** (sleep, stress, fatigue piling up). Each needs a different fix, and guessing wrong costs you weeks.

Progression Unlock walks you through which one it is and what to change next: the full stall diagnostics, the stall triage checklist, the deload decision tree, and the 3-lift tracking sheet.

$147/month, or $397 one-time. Follow it for 30 days. If your logged lifts show no progress, full refund.
